Paragraphs: Established in 1848, the Boston Public Library is a pioneer of public library service in America. It was the first large free municipal library in the United States, the first public library to lend books, the first to have a branch library, and the first to have a children's room. As a City of Boston historic cultural institution, Boston Public Library today features a central library and twenty-five neighborhood branches, serving nearly 4 million visitors per year and millions more online. Boston Public Library is a department of the City of Boston, under the leadership of Mayor Michelle Wu.; The mission of the Library is focused on four core areas: reading and literacy, spaces and programs, reference and instruction, and special collections and cultural heritage. Our commitment to be 'Free to All' is carved into the facade of the Central Library in Copley Square, and we are proud to welcome everyone equally regardless of gender, race, national origin, sexual orientation,

faith, or economic status.; The Central Library in Copley Square encompasses two buildings, both landmarks. The historic McKim building, designed by architect Charles Follen McKim and opened in 1895, houses the Library's distinguished research and special collections. Known for its classical serenity and elegance, it features historical artwork by Daniel Chester French, John Singer Sargent, and more, as well as the magnificent Bates Hall reading room. The Boylston Street Building (formerly called the Johnson Building), designed by Philip Johnson and opened in 1972, underwent an award-winning renovation by William Rawn Associates, Architects, Inc. reopening in 2016. The transformed 21st century library space features a broadcast studio and innovation center.; The Library's twenty-five branches are spread across the city, and each location is a civic hub offering WiFi, citizenship information, computer access, and collections. Young people of all ages participate in storytimes, sing-alongs, technology classes, arts and crafts, homework help, and annual themed summer reading events. Adults can participate in everything from yoga to ESL and book club groups. Ongoing renovations and facility upgrades across the system are transforming and modernizing these beloved community gathering centers.; Boston Public Library holds more than 23 million items, estimated to be among the three largest collections in the country, including books, maps, manuscripts, letters, drawings, and other original works dating back as early as the 10th century. Notable items include first edition folios by William Shakespeare, original music scores from Mozart to Prokofiev's "Peter and the Wolf;" and the personal library of President John Adams. The Library continues to make its impressive special collections accessible to the public through a robust digitization program, all available online at Digital Commonwealth. Our circulating collection of 1.6 million items includes books, DVDs, and audiobooks, as well as downloadable e-books, audiobooks, and magazines, and streaming media.; At the Boston Public Library, books are just the beginning.; ; You already love the library, now you can wear it too! With every purchase, you are helping support the BPL. Visit our gift shop.; Powered by BiblioCommons.; BiblioWeb: webapp06 Version 4.16.1 Last updated 2023/12/13 09:04

Paragraphs: Established in 1848 by an act of the General Court of Massachusetts, the Boston Public Library (BPL) was the first large free municipal library in the United States. In 1839, French ventriloquist M. Nicholas Marie Alexandre Vattermare became the original advocate for a public library in Boston when he proposed the idea of a book and prints exchange between American and French libraries. The Mayor of the City of Boston, Josiah Quincy, Jr., first president of the Board of Trustees, Edward Everett, and his successor, George Ticknor, were also at the forefront of the library's establishment.; Boston Public Library's first building of its own was a former schoolhouse located on Mason Street that opened to the public on March 20, 1854. However, it was obvious from opening day that the quarters were inadequate for the library's collection of sixteen thousand volumes. In December 1854, library commissioners were authorized to locate a new building on a lot on Boylston Street, which opened in 1858 at 55 Boylston Street with seventy thousand volumes. Twenty years later, as the library outgrew that space, the Trustees asked the state legislature for a plot in the newly filled Back Bay. On April 22, 1880, the state granted the City of Boston a lot at the corner of Dartmouth and Boylston Streets.; Charles Follen McKim of McKim, Meade, and White was appointed the principal architect in 1887 for the new building. The present Central Library in Copley Square has been home to the library and has served as its headquarters since 1895, when Charles Follen McKim completed his "palace for the people."; In 1986, the National Park Service designated the McKim building a National Historic Landmark, citing it as "the first outstanding example of Renaissance Beaux-Arts Classicism in America." Within the McKim Building are exquisite murals series by John Singer Sargent, Edwin Austin Abbey, and Pierre Puvis de Chavannes, a peaceful inner courtyard, and additional works of famed sculptors and painters that can be viewed via the library's daily art and architecture tours. Bates Hall, the iconic reading room located on the second floor of the McKim building, is named in honor of Joshua Bates, a London merchant banker born in Weymouth, MA, who in 1852 donated \$50,000 for the library's establishment and another \$50,000 for the purchase of books. He was the first major benefactor of the BPL and initiated that its services be "free to all."; The McKim building restoration and renovation project began in 1980 with a planning grant from the Massachusetts Historical Commission that enabled the Trustees of the Boston Public Library to undertake an initial feasibility study, and Mayoral and City Council approval was received by 1983. The multiphase project began in 1991 and was completed in 2002 and included renovation of several public services spaces, mechanical, electrical, and telecommunication systems, and historic restoration work including the courtyard.; In the latter half of the nineteenth century, the library worked vigorously to develop and expand its branch system. Viewed as a means to extend the library's presence throughout the city, the branch system evolved from an idea in 1867 to a reality in 1870, when the first branch library in the United States was opened in East Boston. Between 1872 and 1900, twenty-one more branches began serving communities throughout Boston's diverse neighborhoods. Today, twenty-six branches serve the 670,000 residents of the City of Boston, with recent renovations and new branches in locations including Jamaica Plain, Chinatown, Roxbury, and Roslindale, with ongoing capital project investments designed to improve the BPL systemwide.; In 1972, the library expanded its Copley Square location with

the opening of an addition designed by architect Philip Johnson, with collaboration from the Architects Design Group of Boston, who observed two requests: to maintain the existing roof line of the McKim building and to use material (Milford granite) that would harmonize with the exterior of the existing building. It was erected adjacent to the McKim building in order to allow patrons to move freely through the buildings. The Boylston Street Building occupies ten levels; four levels of public services, a staff administration and procession floor, four levels of book stacks for the research collection, and one level shared by utilities, maintenance, and stacks. Upon its completion, it contained 450,000 books on open shelves, an expanded children's room and young adult collection, fifty-thousand foreign language items, a modern audiovisual department, and a 374-seat lecture hall named after benefactor Sidney Rabb.; The Central Library today is comprised of the McKim and Boylston Street Buildings, and, thanks to the addition, doubled to nearly one million square feet in size.; The award-winning Central Library Renovation of the Boylston Street Building, approved by Mayor Martin J. Walsh as a capital city project, was completed in July 2016 and designed by William Rawn Associates, Architects, Inc. Goals of the renovation included providing a welcoming and twenty-first century urban library experience to patrons and visitors from around the world, revitalizing programming and spaces, strengthening the two buildings' connection, and reconnecting the building to the street and city. The transformed building features updates to the lower level, first and second floors, mezzanine, and Boylston Street Building exterior. Offerings include a state-of-the-art lecture hall, business library and innovation center, a new Children's Library and Teen Central, a WGBH satellite news bureau and studio, a cafe, a high-tech community learning center, and more.; Central Library Renovation awards.; Powered by BiblioCommons.; BiblioWeb: webapp01 Version 4.16.1 Last updated 2023/12/13 08:53

Summaries of Links: Based on the information provided, it can be inferred that the organization is the Boston Public Library (BPL). The links and URLs included in the information all point to various sections of the BPL website, including library locations, services offered, events, online resources, and support options. The presence of links related to library cards, borrowing from other libraries, and digital collections suggests that the organization is a public library with a focus on providing access to a wide range of resources and services for its patrons. Additionally, the inclusion of links to the BPL's official policies, board of trustees, and financial information indicates a commitment to transparency and accountability. The organization also appears to offer a variety of programs and events for different age groups, including children, teens, and older adults. Overall, the information suggests that the BPL is a comprehensive and community-oriented public library. ""
