

""Twitter handle (and profile name): evolveEA (evolveEA)

Twitter description: evolveEA is a nimble multidisciplinary practice situated at the intersection of sustainability and the built environment.

Description of the organization from a third party source: "Christine is an architect and urbanist who leads communities, public agencies, nonprofit and for-profit organizations through deliberative processes. In her role as Principal of design firm, evolveEA, and in her research as faculty at Carnegie Mellon University, she leads projects that bridge the "expert gap" and give the community increased standing in conversations of public concern. She is especially interested in nontraditional engagement methods and in the policy that supports robust and inclusive engagement."

Summaries of Links: Evolve Environment + Architecture appears to be a company that specializes in sustainable design and architecture. Their website showcases projects focused on placemaking, green building, strategy engagement, and urban design and planning. They emphasize their commitment to eco-friendly practices, including LEED certification and green infrastructure. The company's involvement in initiatives such as the 2030 Challenge and Living Building Challenge suggests their dedication to environmental sustainability. Their work with universities and organizations like Carnegie Mellon University, Yale University, and the University of Pittsburgh highlights their expertise in higher education projects. Evolve Environment + Architecture's presence on social media platforms and their engagement in events and conferences indicate their active participation in the architecture and design community. Their affiliation with organizations like the American Institute of Architects (AIA), the U.S. Green Building Council (USGBC), and the B Corporation Network further demonstrates their commitment to sustainable practices and ethical business operations."""
